We support the basic principles embodied in the bipartisan approach to biosimilars developed by Representatives Anna Eshoo (D-CA), Jay Inslee (D-WA) and Joe Barton (R-TX). The language in their proposal lays out an effective, reasonable and safe pathway for FDA review and approval of biosimilars — products which are similar to, but not the same as, breakthrough biomedical therapies and treatments.

The Eshoo/Inslee/Barton approach is the right medicine for increasing access to biologic medicines, lowering costs, ensuring patient safety and providing fair, responsible incentives for continued biotech research into cures and advanced therapies for patients.

The Pathway for Biosimilars Act: Real Solutions. Real Hope.
